WE ARE AN EMERGING TECH

New Reality for Computing

See new ways to work better together with the ultimate extended/mixed reality devices

Improved Optics

See action unfold with bright, vivid colours and a reduced "screen door" effect.

Ergonomic Design

The halo headband is redesigned with speed and comfort in mind.

360 Touch Controllers

Your slashes, throws and grabs appear in VR with intuitive, realistic precision.

EXPLORE EVERY NEW DETAIL

Work Smarter and Were it with Ease & Comfort

It offers the most comfortable and immersive mixed reality experience available, with industry-leading solutions that deliver value in minutes—all enhanced by the reliability, security, and scalability of the cloud and AI services.

LEARN MORE

Immersive

See more holograms with greatly increased field of view. Read text and see intricate details on 3D images more easily and comfortably with industry-leading resolution.

Instinctual

Touch, grasp, and move holograms in ways that feel natural—they respond a lot like real objects.

Untethered

Move freely, with no wires or external packs to get in your way. The headset is a self-contained computer with Wi-Fi connectivity, which means that everything you need goes with you while you work.

THE NEXT LEVEL OF VR

A Thousand Breakthroughs in One

The most comfortable and immersive VR & mixed reality experience available, with industry-leading solutions that deliver value in minutes—all enhanced by the reliability, security, and scalability of the cloud and AI services.

PC-POWERED VR TECHNOLOGY

A Step Forwards in VR

It insight translates your movements into VR no matter which way you're facing and provides roomscale tracking without external sensors. Look around, duck for cover and turn the tide of the battle from anywhere in your playing space.

IMPROVED OPTICS

Staring Down to the Competition

Next-generation lenses and a sharper display deliver bright, vivid colours and a reduced "screen-door" effect. The advanced hardware works with Oculus software innovations to render smooth gameplay on a wide range of PCs.

ERGONOMIC DESIGN

Keep Your Head in the Game

Thanks to a halo headband redesigned with speed in mind, Rift S stays securely and comfortably in place with a quick twist of the fit wheel, so it can take, or double-take, your fastest reactions.

Azure mixed reality services

Create for the intelligent cloud and intelligent edge

Azure Remote Rendering

Render high-quality interactive content and stream it to your devices in real time.

Azure Object Anchors

Align and anchor 3D content to physical objects.

A New Reality for Healthcare

Mixed reality is empowering providers, payors, and health science experts to reimagine healthcare by accelerating diagnoses and reducing time-to-care, enabling personalization and improving outcomes.

See how Medivis is empowering surgeons and clinicians to improve surgical accuracy and deliver better patient outcomes.

Reimagine Healthcare

Leverage mixed reality to enable continuous learning and widespread knowledge sharing. Doctors, nurses, technicians can train and practice using simulated training—ensuring the entire organization keeps pace with advances in science and technology.

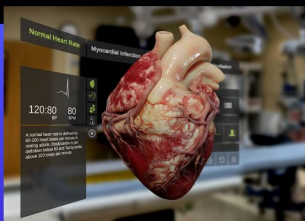

Empower Care Teams

Use mixed reality to superimpose 3D views of MRI images and CT scans to assist specialists and surgeons before and during surgery—improving precision and reducing the need for additional interventions.

Enhance the Patient Experience

Empower doctors and clinicians to rapidly share imaging results, better contextualize physician-patient conversations, and drive more informed patient decision-making—improving quality of care and the patient experience.

Insight Heart

Examine every bone in a highly detailed skeleton. Use the spatial menu to rotate and scale textures, and see a high-resolution heart float before your eyes. Integrated spatial sound makes the heartbeat louder as you walk closer, and haptic feedback on the controller lets you feel the pulse in the palm of the hand.

XReality .
